

## Broad selections for screening

Looking for trees to give you that natural screen and don't know where to start? How about right here.

### **Waterhousea floribunda 'ST1'** **Whisper (syn. Syzygium)** **WHISPER WEEPING LILLY PILLY TREE**

Unique to Speciality Trees and our best-selling and most popular tree! This is a versatile, bushy tree with a wonderful weeping habit making it perfect for large screening projects and the softening of fence lines. Propagated from Victorian mother-stock, unlike other Waterhousea, so responds better to all weather conditions, including cooler climates. New growth starts off pink and orange with leaves turning to various shades of green as the foliage matures. Foliage is maintained to the base of the plant giving a year-round lush, full appearance. It forms a small quantity of creamy-white flowers in summer. Berry production on 'Whisper' is unlike other Lilly Pillies, with minimal quantities of small green berries that, whilst bird attracting, these fruits are tucked in amongst the foliage and are not obvious.

### **Angophora costata** **SMOOTH-BARKED APPLE MYRTLE TREE,** **RUSTY GUM TREE**

This attractive Australian native Angophora (syn. Eucalyptus) is loved for its smooth bark that is slightly purple in colour. It has large and twisted limbs and a very large expanded trunk base. It bears white flower clusters in spring. This tree has opposite leaves compared to alternate leaves as seen in eucalypt tree varieties. It has beautiful red new growth.

## **Hakea francisiana 'Intensity'**

### **INTENSITY GRASS-LEAFED HAKEA TREE**

Hakeas are known for their delicate woven-looking flowers - this Australian native tree/shrub is no exception. Green linear leaves up to 150mm long x 3mm wide and slightly curved. The impressive flowers are pink-red and profuse through late winter & spring.

## **Allocasuarina torulosa**

### **FOREST SHEOAK TREE**

This tree has a corky light brown bark that has deep fissures. The leaves are thin green needles like a pine tree. There are female and male trees with gold male flowers in Autumn and female rounded warty cones. In Winter the branchlets turn a beautiful copper colour.

## **Lophostemon confertus**

### **QUEENSLAND BRUSH BOX (TREE)**

Lophostemon confertus grows as a dense tree to 15 metres tall and 10 metres wide. It has glossy green leaves, small white flowers and coloured bark that peels in summer. We have good numbers in both 50 litre containers and 100 litre bags.
