

Frontline Coastal versus Coastal. Growing position is important.

Coastal trees are trees that are tolerant of the typically sandy and salty conditions associated with living along the coast. But only a select few can be called Frontline Coastal.

Allocasuarina verticillata **DROOPING SHEOAK TREE**

A medium sized bushy tree that has a rounded head. It has weeping dark green branchlets that produce brown male flowers from winter to early spring. These trees when young can look rather sparse and scraggly but this changes with age. They sound like the ocean when the wind blows through their leaves.

Banksia integrifolia **COASTAL BANKSIA TREE**

This distinctive native tree is found on the east coast of Australia. It has rough patterned bark and long green leaves with a silver underside. Pale yellow, cylinder-shaped flowers can be seen in summer to winter and can be up to 12cm long. The seed pods stay on the branch for long periods and look very ornamental.

Banksia integrifolia 'Sentinel' **'SENTINEL' BANKSIA TREE**

This is a small shrub with medium frost tolerance for use as a dense narrow flowering screen. Preferring full sun to light shade it produces upright lemon brush-like flowers from late summer to winter. Responds well to pruning.

Allocasuarina torulosa

FOREST SHEOAK TREE

This tree has a corky light brown bark that has deep fissures. The leaves are thin green needles like a pine tree. There are female and male trees with gold male flowers in Autumn and female rounded warty cones. In Winter the branchlets turn a beautiful copper colour.

Leptospermum obovatum 'Starry Night'

STARRY NIGHT TEA TREE

A versatile, fast growing shrub with fine, deep purple foliage forming a graceful, weeping habit with its purple-pink new growth. In late spring and summer, bronze buds open to a profusion of long-lasting snowy white flowers. A great Australian native adaptable to a variety of soil types and conditions and can be used as a screen, hedge or specimen plant.

Laurus nobilis 'Miles Choice'

HEDGING BAY TREE

This Bay tree offers a more compact form and grows slightly smaller than the traditional Bay Tree to around 7m tall, with denser, glossy, dark green foliage.

Allocasuarina littoralis

BLACK SHEOAK TREE

An erect conical shaped tree which has dark fissured bark which looks black at certain times of the year. This fast growing tree bears showy red male flowers in spring. The female has small spiky cones

sheets are varieties either ready for sale or in production. This is an information source and not confirmation of availability. It is strongly recommended that users enquire about product availability independently of this source.
