

## Squeeze me in! Trees for tight spaces

Our modern living has us making the most of every bit of landscape space we can. Trees for screening off other properties is in high demand. Talk to us for recommendations based on size and aspect suitable for your project.

### **Pyrus calleryana 'Capital'** **CAPITAL ORNAMENTAL PEAR TREE**

This tree has a narrow growth habit with luscious shiny green leaves that hang vertically from branches. An attractive curl in the foliage adds further interest and the slender, columnar shape lends itself well to tight spaces. In autumn, leaves turn a purpley-red colour and spring brings a beautiful display of lovely white flowers followed by small, russet coloured fruits.

### **Liriodendron tulipifera fastigiata** **UPRIGHT TULIP TREE**

A smaller tree which is more upright than it is wide, forming a tear drop shape with age. It offers the same beautiful characteristics as straight *L. tulipifera* but its growth habit is much narrower with erect, upright growing branches. From late spring to summer, large yellowish-green, tulip-like flowers decorated with orange markings appear. In autumn the large lime green leaves turn a rich, golden-yellow before falling. This variety is suitable for smaller gardens due to its narrow growth habit.

## **Magnolia grandiflora 'Sweet Spire'<sup>TM</sup>**

### **SWEET SPIRE MAGNOLIA TREE (EVERGREEN)**

This is a new selection of evergreen Magnolia suitable for little spaces in full sun or part shade. 'Sweet Spire' grows upright and slim with dark green leaves. It produces creamy white flowers from spring to autumn.

## **Acer platanoides 'Crimson Sentry'**

### **UPRIGHT CRIMSON NORWAY MAPLE TREE**

This is a flashy crimson foliated maple with dense upright branching. It has a compact growth habit with large crimson leaves in summer turning to gold and orange in autumn. Adds great colour contrast foliage. This is a small tree with grey-black bark that is lightly textured.

## **Syzygium australe 'SAN01' Straight and Narrow<sup>TM</sup>**

### **STRAIGHT AND NARROW LILLY PILLY TREE**

This Lilly Pilly is a better form than the narrow growing 'Pinnacle' due to its dense foliage and naturally columnar form. Foliage is a mid-green colour and fruits are reddish-pink. As the name suggests it is a great selection for narrow spaces.

## **Betula pendula fastigiata**

### **UPRIGHT SILVER BIRCH TREE**

This tree has an unusual growth habit, the branches intertwine with each other and grow inwards thus producing an erect habit. The leaves are triangular shape and have a serrated edge. They change from green to butter yellow in autumn. The ornamental white trunk sheds in sheets paper thin. It has deep black fissures in the lower trunk. This tree looks fantastic during its dormant period.

## **Ginkgo biloba 'Blagon Fanfare'**

### **BLAGON FANFARE GINKGO TREE**

This variety of Ginkgo, with its natural pyramidal growth habit, is ideal for use in hedging, driveways and avenues. It's a hardy and low-maintenance tree, providing typically fan-shaped foliage that turns from green to a stunning golden-yellow in autumn.

## **Banksia integrifolia 'Sentinel'**

### **'SENTINEL' BANKSIA TREE**

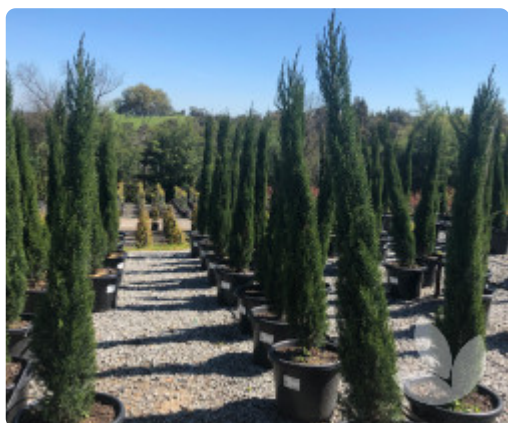

This is a small shrub with medium frost tolerance for use as a dense narrow flowering screen. Preferring full sun to light shade it produces upright lemon brush-like flowers from late summer to winter. Responds well to pruning.

## **Thuja plicata fastigiata**

### **UPRIGHT WESTERN RED CEDAR TREE (ARBORVITAE)**

A relatively fast grower, reaching approximately 5m in the first 10 years. Mid green horizontal branchlets droop slightly and the lush, cedar-scented foliage is flat and dense in habit making it ideal for creating a privacy screen or windbreak in a small space as it will reach a width of only 1.5 metres. It has a compact conical, upright growth habit and responds well to pruning, even reshooting from bare wood after a hard prune. Thuja is immune to canker disease.

## **Cupressus sempervirens 'glauca'**

### **ITALIAN PENCIL PINE TREE**

The Italian Pencil Pine is an excellent, low maintenance choice for creating a formal look in areas where space is limited. This variety has a dense, upright, columnar growth habit and requires very little to no pruning to maintain its shape. Foliage is aromatic with a blue-green shade and produces less fruit than many other pencil pine selections.

## **Callistemon viminalis 'CV01' Slim™**

### **SLIM BOTTLEBRUSH TREE**

This is a narrow growing Bottlebrush great for tight planting spots. It provides all the usual colour and texture qualities of Callistemon, flowering from spring to autumn but with the benefit of being able to use to as a compact alternative in positions that are narrower. Flowers are red and numerous over the warmer months. Of course it can also be used as a screen or hedge to attract birds, bees and butterflies into the garden.

## **Leptospermum obovatum 'Starry Night'**

### **STARRY NIGHT TEA TREE**

A versatile, fast growing shrub with fine, deep purple foliage forming a graceful, weeping habit with its purple-pink new growth. In late spring and summer, bronze buds open to a profusion of long-lasting snowy white flowers. A great Australian native adaptable to a variety of soil types and conditions and can be used as a screen, hedge or specimen plant.
