

Standout Winter Feature Trees

Winter is such a unique time of year for viewing and pruning deciduous trees. Bare-limbed, they are beautiful and full of future potential. If you are purchasing a new tree, what better than to be able to see true form and structure.

Betula pendula 'Moss White' **MOSS WHITE SILVER BIRCH TREE**

This tree has bright green foliage that turns to a pale yellow in Autumn. The trunk is a grey colour when young gradually turning to white. It produces long hanging pale green catkins. 'Moss White' has been selected for its bright white bark.

Cercis canadensis 'Forest Pansy' **BURGUNDY REDBUD TREE**

This small, attractive tree has spectacular heart-shaped, burgundy coloured leaves that continually change colour throughout the year. A rich purple in spring, the foliage transforms to green over summer, followed by a multi-coloured autumn display in tones of red, apricot and gold. The branches have a distinctive, smooth, dark brown wood which contrasts well with the blossom like pink flowers that are borne before the re-emergence of leaves in spring.

Acer palmatum 'Sango Kaku' (syn. 'Senkaki') **CORAL BARK JAPANESE MAPLE TREE**

This tree has attractive double serrated leaves with five to nine lobes. They are green in colour during spring and then turn a bright yellow with an orange tinge at autumn. The striking bark turns a brighter red in winter providing colour throughout the year.

Lagerstroemia indica x fauriei 'Natchez'

CREPE MYRTLE TREE (WHITE)

This small, deciduous tree creates great interest throughout the year. In summer, clusters of spectacular white, crepe-paper like flowers are produced. Following this, the dark green leaves add further interest as they transition into autumn, turning a rich bronze-red colour before falling. Bark also provides colour as the tree matures, with its flakiness revealing the rich, brown underbark.
