

When Bigger is Better. Plant large 100L trees for instant effect!

Think big with this selection of trees, all of which are usually hard to find at this size. Each has a function that will suit a variety of needs and design styles. Best of all, they come to you large - and therefore ready to immediately do what you want them to do.

***Agonis flexuosa* 'Lemon & Lime'**

LEMON LIME WILLOW MYRTLE TREE, WEEPING PEPPERMINT WILLOW TREE

A dwarf variety of the regular native Willow Myrtle. This is a small elegant looking tree that offers striking lemon-yellow weeping foliage changing to lime-green as it ages. It makes a lovely screen, street or feature tree - great for colour contrast in a landscape. Is tolerant of coastal conditions.

Lophostemon confertus

QUEENSLAND BRUSH BOX (TREE)

A rainforest tree native to the North-Eastern parts of Australia, this is a fast growing tree which is rarely affected by pests and diseases. Dome-like in shape, it develops a very dense foliage cover of dark green, leathery leaves providing good shade for the summer months. This variety rarely sheds limbs and has salmon coloured bark which flakes off over summer revealing orange-brown tones on the trunk. Summer also brings clusters of small white flowers whose stamens give them a decorative fluffy appearance.

Corymbia citriodora

LEMON-SCENTED GUM TREE

A beautiful, tall growing Corymbia (syn. Eucalyptus) with a distinctive, often powdery white to grey coloured bark which curls and flakes off in spring. Its leaves are green, long and slender with an amazing, strong lemon fragrance when crushed. Its strong scent is a distinguishing attribute, with the essential oils produced from this variety often being used in fragrances as well as insect repellents. In summer and autumn, feathery white flowers appear, making it a good source of food for honey bees.

Olea europaea 'Tolley's Upright'

TOLLEY'S UPRIGHT OLIVE TREE (LOW FRUITING)

This is a low-fruiting variety of olive tree that has an upright growth. Responds well to pruning and can be grown with a single leader or easily pruned into a hedge for screening. Foliage is silvery.

Tristaniopsis laurina 'DOW10'

Luscious®

LUSCIOUS KANOOKA GUM TREE, WATER GUM TREE

This is an improved variety of the regular Tristaniopsis laurina, a native Australian rainforest tree. Leaves are dark green, shiny and large - and as the name suggests, luscious in appearance! New growth starts out a distinctive copper colour and further interest appears over time with the branches developing deep purple coloured bark which peels back to reveal a smooth, cream trunk. Small trumpet like flowers are yellow and sweetly perfumed, appearing in clusters through summer.
