

Acacia cognata 'Lime Magik'

LIME MAGIK WEEPING WATTLE TREE

This Australian native large shrub/small tree that has pendulous habit with lime green thin soft foliage. This Acacia produces an abundance of soft yellow flowers during late winter and spring that have the appearance of soft yellow snowflakes. Its colour and fine weeping foliage makes it a stunning specimen tree or contrast planting.

As such a graceful wattle, it is a immediate attraction planted almost anywhere in the garden, for contrast colour and foliage. Can also be used for screening and planted in rows for a hedge.

Can tolerate acidic to alkaline or light to heavy soils. Does prefer a moist, well drained soil in a dappled shade position. This Acacia can tolerate light frosts.
