

Agonis flexuosa 'Lemon & Lime'

LEMON LIME WILLOW MYRTLE TREE, WEeping PEPPERMINT WILLOW TREE

A dwarf variety of the regular native Willow Myrtle. This is a small elegant looking tree that offers striking lemon-yellow weeping foliage changing to lime-green as it ages. It makes a lovely screen, street or feature tree - great for colour contrast in a landscape. Is tolerant of coastal conditions.

Plant as a feature or specimen tree for its beautiful flowing contrasting colour. A good native alternative to a Willow Tree.

Prefers a nutrient rich organic soil in a full sun position. It will tolerate loam and clay soils and coastal conditions.
