

Allocasuarina torulosa

FOREST SHEOAK TREE

This tree has a corky light brown bark that has deep fissures. The leaves are thin green needles like a pine tree. There are female and male trees with gold male flowers in Autumn and female rounded warty cones. In Winter the branchlets turn a beautiful copper colour.

Ideal for dry areas and a great street tree where there are no overhead wires. Fantastic specimen tree for medium to large gardens.

A hardy tree in most soils and aspects. Can handle little moisture and very poor soils.
