

Allocasuarina verticillata

DROOPING SHEOAK TREE

A medium sized bushy tree that has a rounded head. It has weeping dark green branchlets that produce brown male flowers from winter to early spring. These trees when young can look rather sparse and scraggly but this changes with age. They sound like the ocean when the wind blows through their leaves.

Excellent windbreak in coastal areas. Great for shade and shelter. Good specimen tree or street tree. Can grow in even the most difficult soils.

Tolerates most soils and aspects including coastal. Prefers full sun position and is extremely heat tolerant. Minimal maintenance is required once established.

Foliage Evergreen

Form Pendulous

Mature Size 9 x 5m

Family Casuarinaceae
