

Castanea sativa 'April Gold'

APRIL GOLD CHESTNUT TREE

This is a fast-growing, deciduous fruiting tree with dark green foliage and clusters of scented, white and yellow flowers in spring. Fruit is produced in autumn after flowers are finished. Nuts grow in a prickly golden casing. This tree has an upright habit. Requires 2 compatible trees to pollinate.

An edible fruiting variety that produces dark nuts used for roasting and cooking after 2-3 years. Matures early April.

Prefers a free draining soil in a sunny position.
