

Cercis chinensis

CHINESE REDBUD TREE

This attractive small tree or shrub is slightly smaller than *Cercis silaquastrum*. It has abundant groups of rosy-purple spring flowers and attractive heart-shaped green leaves. Looks stunning in spring when in full flower and would suit ornamental gardens when planted as a feature.

A great small tree for use in gardens and as a deciduous screen.

Suited to most soils. Will tolerate heavy soils and hot, dry periods. Also suitable for colder climate gardens, should cope with frosts and light snow.

Foliage Deciduous

Form V-Shaped

Mature Size 5m x 5m

Family Fabaceae,
subfamily
Cercidoideae
