

Tree

Acacia binervia 'Sterling Silver'

COASTAL MYALL WATTLE TREE

Description

This dwarf shrub form of the Coastal Myall Wattle tree is a nice addition to any garden and is a noteworthy specimen in coastal areas or where soil erosion may be a problem. Foliage is handsomely broad in shape, smooth and silver in colour. Long lemony-yellow flowers are produced in spring and the seed pods that follow are bird-attracting. It is native to the coastal and tableland regions of NSW and Queensland

Foliage

 Evergreen

Form

 Shrub

Mature Size

3 x 2m

Uses

This wattle is perfect as a filler tree or shrub depending on required size, or hedged as an understory planting. Works beautifully as a mature height screen. We grow this variety as a single leader specimen fully branched to the floor.

Position & Soil

Prefers a well-drained soil but is moderately tolerant of other types. Is wind, drought and coastal hardy with light frost tolerance. Plant in full sun.
