Tree	
	Agonis flexuosa
	WILLOW MYRTLE, WEEPING PEPPERMINT WILLOW TREE
Description	An attractive medium-sized tree with a pendular weeping habit. It has clusters of small white flowers that grow on the branches in between the leaves in spring and summer. Has nice long thin shiny leaves that hang from the drooping branches giving it an allover similar appearance to a Willow tree.
Foliage	& Evergreen
Form	( Pendulous
Mature Size	10 x 5m
Uses	A great specimen plant or native alternative to a Willow tree. Great in streetscapes and parks and gardens.
Position & Soil	Full sun is best and works well on the coast in sandy soils. A very hardy tree that can tolerate a range of soil types and positions does prefer a moist, well drained soil.
