Tree	Betula pendula dalecarlica CUT LEAF BIRCH TREE
Description	This attractive tree has a pryamidal to ovate shape. The unusual feathery foliage is light green in spring and summer. In autumn the leaves turn a brilliant yellow. When the tree matures the leaves form a drooping effect due to lateral branches. It has an ornamental white trunk that sheds in paper-thin strips.
Foliage	⊗ Deciduous
Form	Branches Ascending
Mature Size	12 x 5m
Uses	An attractive specimen tree for medium to large gardens. Looks stunning in group plantings especially avenue planting. Great feature tree that can also be used in streetcapes.
Position & Soil	Grows well in most soils in a sunny to part shade position. Do not prune in late winter or spring as this causes it to bleed profusely.
