

Diospyros kaki 'Fuyu'

FUYU JAPANESE PERSIMMON TREE

Tree	
Description	<p>This Japanese Persimmon tree is medium-sized and has an upright, spreading habit. It is a heavy bearing variety, and produces large, flat, deep orange, tomato-shaped fruits without the need for cross pollination. The fruit is a non-astringent variety, so can be eaten while still firm. In Autumn, the glossy green foliage provides a beautiful display turning an array of reds and oranges. As the leaves drop, the vibrant fruit remains hanging on the bare branches becoming sweeter as they ripen.</p>
Foliage	 Deciduous
Form	 Round
Mature Size	10 x 6m
Uses	Produces non-astringent large, flat, deep orange, tomato-shaped fruits.
Position & Soil	A full sun position will be required for optimal fruit development. Also suitable for colder climate gardens, including frosts and light snow.
