

Magnolia x soulangeana 'Vulcan' TM

VULCAN MAGNOLIA TREE (DECIDUOUS)

Tree	
Description	This hybrid deciduous magnolia has a compact growth habit, making it a good choice as a specimen tree for smaller gardens. It has large furry light brown buds, which develop a tulip like appearance before opening out to the gorgeous, large, fragrant flowers of deep magenta in late winter. Large vibrant green leaves follow the flowers - a beautiful feature tree.
Foliage	 Deciduous
Form	 Oval
Mature Size	6 x 4m
Uses	Deciduous magnolias make beautiful and striking feature trees in any garden.
Position & Soil	While tolerant of most soil types preference is for well drained humus rich soil in full sun or part shade.
