

Prunus avium 'Lapins'

LAPINS CHERRY TREE

Tree	
Description	<p>This is a late maturing cherry, the heavy crops of dark red to mahogany fruit appearing late in the season. Lapins are self-fertile, however they produce better from cross-pollination with another cherry tree of the same or a different variety, such as 'Stella' Cherry.</p>
Foliage	<input checked="" type="checkbox"/> Deciduous
Form	<input checked="" type="checkbox"/> Oval
Mature Size	4 x 2m
Uses	<p>This is an excellent choice for backyards as it is a compact grower to approximately 4m tall. Late season maturity. Good for eating fresh and for jams.</p>
Position & Soil	<p>it is suitable for growing in warm temperate and cool temperate regions.</p>
