

## **Prunus persica nucipersica 'White Satin'**

**WHITE SATIN NECTARINE TREE (LOW-CHILL)**

|                                |  |
|--------------------------------|--|
| <b>Tree</b>                    |  |
| <b>Description</b>             | This is a beautiful blushed bright-red and yellow skin nectarine with white flesh. It produces aromatic, sweet and juicy fruit. Flowers in late winter and fruit in December. 'White Satin' is self-pollinating and works well in both warm-temperate and subtropical climates, as it requires low chill hours.  |
| <b>Foliage</b>                 |  Deciduous  |
| <b>Form</b>                    |  Round  |
| <b>Mature Size</b>             | 4m x 4m  |
| <b>Uses</b>                    | This is a self-pollinating nectarine and can be pruned to 2m which makes it ideal for small gardens. Suitable for planting in 35+ litre containers.  |
| <b>Position &amp; Soil</b>     | Plant in a full sun position with a neutral good draining soil. Prune after fruiting in summer to encourage fruiting wood for the following season. It is a low-chill variety and is frost-tolerant. The tree is deciduous and loses leaves in winter.   |
| <b>Features</b>                | <ul style="list-style-type: none"> <li> Small</li> <li> Deciduous</li> <li> Round</li> <li> Fruiting &amp; Edible</li> <li> Group Planting</li> <li> Specimen</li> </ul> |
