

Thuja occidentalis 'Smaragd'

EMERALD GREEN ARBORVITAE (TREE)

This tree is smaller growing with bright green flat branchlets that slightly weep. The undersides are often a dull grey colour and they are slightly scented. It has a compact pyramidal shape. Thuja varieties are immune to canker disease.

 Evergreen

 Conical

3-4 x 1-2m

Can be used for screening and great for smaller gardens. Ideal for formal garden designs. Responds well to pruning.

Will tolerate most soils in a full sun position or partly shaded. Prefers well-drained soil but may need watering in dry periods. Responds well to pruning - prune in early spring before onset of new growth. Thuja is not susceptible to canker.
