

Corymbia ficifolia 'Cape Crimson'

GRAFTED FLOWERING GUM

This grafted flowering gum produces a vibrant pink flower in summer. Grafting is done on rootstocks to ensure tolerance to a wide range of soil types. Bird attracting.

It makes a lovely feature tree to approx. 7m tall in ideal conditions.

This variety prefers a full sun position in a well-drained soil. Benefits from the use of a native fertiliser once a year. Mulch around the base of the tree to assist water retention particularly in hot, summer months.
