

Cupaniopsis anacardioides

TUCKEROO TREE

This is an attractive Australian native that is popular as a street tree due to its dark green foliage, compact height, rounded form and non-invasive root system. Cream flowers appear during autumn followed by bright orange fruit making it a favourite tree for birds too.

Great for use in streetscapes, parks and as a feature tree in residential gardens. Can be used for screening.

Prefers a sunny or part shady position in a free draining soil rich in organic matter. Mulch and water well until the plant is established.
