

Eucalyptus mannifera

BRITTLE GUM TREE

Native to the eastern parts of Australia, this tree has an open spreading habit with contorted limbs. The trunk has unusual greyish bark that turns red before it sheds. Foliage is narrow, curved in shape and blue-green in colour. It produces small clusters of creamish white flowers from Summer to Autumn.

A suitable Australian native for parks and gardens with some open space. Can be used for wide streetscapes. Great for habitat for native birds and insects.

Although tolerant of most soils it prefers a free-draining soil in full sun.
