

Gleditsia triacanthos var. inermis 'Emerald Cascade' (weeping standard)

WEeping HONEY LOCUST TREE (STANDARD)

This small, grafted tree has a weeping habit with dark green foliage. The bipinnate leaves turn to a golden yellow in Autumn. We offer this species as a grafted weeper about 2 metres tall.

As a grafted weeper, this species makes a fantastic feature tree in classic gardens or small courtyards. The colour and weeping habit make it a stunning tree in any landscape.

Best suited in deep, fertile, moist yet well-drained soil in a full sun position. It can tolerate a wide range of growing conditions. Tolerates air pollution and urban conditions. Ensure any shoots that develop under the graft point are removed cleanly and promptly.
