

Lagerstroemia indica x fauriei 'Lipan'

CREPE MYRTLE TREE (LAVENDER-MAUVE)

This tree has spectacular mauve-lavender flowers borne in clusters in late summer. It has a beautiful compact growth habit with dark green leaves changing to yellow and orange before falling in late Autumn.

A lovely, compact shade tree useful around buildings, car parks, and against fences. A clever choice for space-limited landscapes. Seasonal beauty with smooth winter limbs and summer flower bracts. Relatively-hardy, this variety is resistant to powdery mildew and will tolerate periods of dryness once established.

Best in moist, well drained, slightly acidic soils in a position receiving full sun.
