

Lagerstroemia indica x fauriei 'Zuni'

Foliage Deciduous
Form V-Shaped
Mature Size 4 x 3m
Family Lythraceae

CREPE MYRTLE TREE (PURPLE)

This variety can be used as a shrub or small tree. Foliage has red tinges when young and matures to a shiny dark green, with autumn foliage providing a colourful display of orange, red and maroon. Stunningly beautiful and free-flowering, masses of violet-purple flowers appear from summer through to autumn. Bark provides further interest as it peels, creating a mottled effect on the trunk. We grow this tree with a single trunk.

This is a great specimen tree suitable for small garden areas, as a street tree in road reserves, in centre courtyards and building entryways. A clever choice for space-limited landscapes. Seasonal beauty with smooth winter limbs and summer flower bracts. Relatively-hardy, this variety is resistant to powdery mildew and will tolerate periods of dryness once established.

Prefers moist, well drained, slightly acidic soils, in a location receiving full sun.
