

## Liquidambar styraciflua 'Rotundiloba'

### LIQUIDAMBAR TREE, FRUITLESS SWEETGUM

This large deciduous tree is known for its unique foliage, shape and spectacular autumn colour. It produces dark green leaves with rounded lobes that turn yellow to burgundy-red in autumn for extended periods. It has a slightly narrow pyramidal form when young but matures to a more oval shape. Has a moderate to fast growth rate.

This selection of Liquidambar makes a superb specimen or shade tree for large open spaces such as parks and gardens.

Prefers a full sun position and humus-rich soil.
