

Malus floribunda

JAPANESE CRAB APPLE TREE

An attractive ornamental tree that puts on an outstanding floral display in spring. White and reddish-pink flowers are in abundance over this time, making it a distinctive focal point in any garden.

A great selection for a feature tree in a small or medium garden. Could be group planted or used as in avenue planting.

Prefers well-drained organic-rich soils in a part shade position. Also suitable for colder climate gardens, should cope with frosts and light snow. A slightly acidic soil is preferred, as it does not tolerate high pH.

Foliage Deciduous

Form Round

Mature Size 5 x 5m

Family Rosaceae
