

Photinia x fraseri 'Red Robin'

RED ROBIN DWARF PHOTINIA TREE

With glossy foliage, this shrub is a great selection for hedging. Frost hardy once established, new growth has a vibrant red tinge throughout the year. Clip to shape regularly for maximum colour.

Used extensively for hedging as it is hardy and relatively low maintenance. Prune as required to promote new growth and maintain shape.

Prefers a sunny or partly shaded position in the garden, in soil that is mulched well. Tolerates mild frost once established. Fertilise with a slow release fertiliser twice yearly.
