

Pinus flexilis 'Vanderwolf's Pyramid'

LIMBER PINE TREE

This is a form of pine tree with an upright, conical shape and a strong central leader. Unlike most pines, the silvery blue-green needles are soft and closely spaced. Branches are flexible and interestingly twisted with an open habit when young which becomes bushier with age, generally growing faster in height than width. This variety likes well drained soil and is a good choice for hot, dry areas.

A lovely tree for colour, texture and shape. Ideal for garden contrast.

Grows best in full sun. Prefers a well drained, sandy soil.

Foliage Evergreen

Form Conical

Mature Size 6 x 2m

Family Pinaceae

Small

Evergreen
