

Prunus yedoensis x subhirtella 'Snofozam' (weeping standard)

SNOW MOUNTAINS WEEPING ORNAMENTAL CHERRY TREE

A prolific bloomer and beautiful Autumn colour all in one compact tree! This variety of grafted Weeping Cherry has a strong weeping habit. Spring offers masses of white flower clusters which cover the pendulous branches before the reddish-bronze new growth begins to emerge. Through the warmer months, the serrated foliage turns green and by autumn another beautiful display of colour can be seen in shades of orange, gold and red.

This is a compact feature tree that lends itself well to smaller gardens. It is a classic choice for Japanese inspired landscapes.

It prefers a well-drained, fertile soil in a mild to cool climate. They are considered very frost hardy. They appreciate an annual feed with a balanced, slow-release fertiliser.
