

## Pyrus calleryana 'Aristocrat'

### ARISTOCRAT ORNAMENTAL PEAR TREE

This is a broad form of ornamental pear with horizontal branching. It has attractive dark green foliage with a wavy margin. In autumn foliage colour changes to a range of shades between yellow and red. In spring it produces an abundance of white blossom-like flowers that cover the tree. It is a similar size to 'Cleveland Select', but with a wider, more open form.

An attractive and versatile tree, typically used for many amenity situations including parks and streetscapes.

This tree performs best in full sun but can adapt to a wide range of sites, soils and conditions.
