

Robinia pseudoacacia 'Frisia'

GOLDEN ROBINIA TREE

This attractive deciduous tree provides soft filtered shade with its open habit and pinnate leaf shape. It is a moderate grower with striking lime green foliage which intensifies into a vibrant, golden colour in autumn. Long white, pea-like flowers are fragrant and appear in early summer, followed by smooth brown seed pods. Suitable for hot dry climates and coastal conditions, however it does need shelter from strong winds as the branches may tend towards being brittle.

Robinia 'Frisia' makes a great residential feature tree due to its striking foliage colour and dappled shade. Can also be used for street planting or in parks and gardens.

This selection is tolerant of most soil types although it does prefer a moist well drained soil and full sun.
