

Thuja occidentalis fastigiata

GREEN COLUMN ARBORVITAE (TREE)

This tree has flat horizontal dark green branchlets. It has a neat compact columnar form and lovely deep green foliage all year round. Thuja is immune to canker disease.

Often used as a screening or hedging plant. Good for small gardens and formal design gardens.

Will tolerate most soils in a full sun to part shade position. Likes normal to moist soils in a cooler climate. Mostly low maintenance apart from the occasional pruning, and is not susceptible to canker.
