

Tristaniopsis laurina 'DOW10' Luscious ®

LUSCIOUS KANOOKA GUM TREE, WATER GUM TREE

This is an improved variety of the regular *Tristaniopsis laurina*, a native Australian rainforest tree. Leaves are dark green, shiny and large - and as the name suggests, luscious in appearance! New growth starts out a distinctive copper colour and further interest appears over time with the branches developing deep purple coloured bark which peels back to reveal a smooth, cream trunk. Small trumpet like flowers are yellow and sweetly perfumed, appearing in clusters through summer.

Foliage Evergreen

Form Oval

Mature Size 8 x 4m

Family Myrtaceae, tribe
Kanieae

Its denser foliage and form makes for an attractive hedge or screen. A great summer shade tree or feature tree.

This variety tolerates a wide range of soil and climate conditions including frost. Not suited to very hot or dry climates or exposure to hot winds without regular watering. Will tolerate most moist, well drained soils in full sun. Whilst it copes with occasional wet ground, it is not suitable for inundated or saturated soil conditions.
